ANNOUNCER:

There are a lot of reasons to register for a motorcycle rider course, no matter how long you've been riding, or how many times you've taken a course before. For example, motorcycles handle differently on curves, and it's harder to see ahead. Keep your skills sharp with a motorcycle rider course. Making the right choices with speed, lane location, wearing all the gear all the time, and watching your surroundings could save your life.

Brought to you by the North Dakota DOT and North Dakota Motorcycle Safety Program through Vision Zero.
